

GRU

Christophe Delcourt

To have inspiration leap out like a music note and continue into a beautiful melody is every designer's dream. GRU cabinet collection brings the rhythm concept to cabinet design to break through the boring look of most cabinets. The GRU TV cabinet put every 'note' at the perfect handle height. The designer presents the concept in a user-friendly design, making the cabinet a perfect combination of function and form.

STRUCTURE

Structure in veneer on particles board, handles and base in metal

FINISHING

Structure in walnut or stained oak, handles and base in dark green lacquered metal
